Optional Light Kit Taki	298
Accesories	299

## OUR PURPOSE

“Faro Barcelona exists to contribute to the wellbeing and happiness of people through design and the relationship we establish with the objects that surround us in our daily lives. We believe in honest and accessible design. Design for everyone.”

Xavier Martin  
CEO

## A BRAND WITH SOUL

“We believe in the power of enthusiasm to move forward and surf the waves the best way we know while enjoying the process and radiating light around us.”

# SUSTAINABILITY

Our sustainability journey focuses on two main objectives: reducing our negative impact on the planet and maximising our positive social impact.

## People

### The value of a great team

At Faro Barcelona, sustainability starts from the inside, taking care of the well-being and personal growth of our team.

### Equality and diversity

At Faro Barcelona all people are great and equal, whatever their gender, age, religion or sexual orientation. Women, as well as men, play an important role: 76% of our team and 49% of our leaders are women.

### Community support

For over a decade, we have been collaborating in social projects of foundations providing our help to ensure a better quality of life for the people helped by these organisations. Since 2008, we have had our own social project with Hook, each luminaire sold feeds a child in Africa for one year.

### Supporting new talent

We collaborate with universities and design schools to help new talents emerge into their professional development. Projects such as Reborn, a second life for waste (La Llotja), make It design with 3D printing (CIM UPC), are some of the collaborations we have carried out.

### Social innovation

We take part in disruptive social innovation research and develop products and services that solve social problems such as the ageing of the population. We have a positive impact on people's quality of life, contributing to their well-being and comfort through quality, accessible and sustainable lighting and design.

## Planet

### Sustainable packaging

Our packaging is made of recycled cardboard boxes printed in one ink and without staples to ease the disassembly and the right recycling.

We have eliminated single-use plastics and replaced them with recyclable paper bags and we use recycled cardboard shavings to protect the product during transport in 60% of our shipments. All our packaging meets Drop Test ISTA-2C quality standards to ensure products arrive in perfect condition.

### More sustainable logistics and transport

We have optimised the packaging size of each product to reduce the amount of packaging material and the carbon footprint of transport. We have opened a new logistics centre in China to supply our Asia-Oceania market in a more sustainable way and reduce carbon emissions from transport.

### Sustainable workspaces

We use green electricity in our offices. We produce 70% of the energy we consume with our own photovoltaic installation, ensuring that the energy is from renewable sources. In addition, our headquarters are designed to maximise the use of solar energy and natural light.

### Supporting new talent Team committed to sustainability

At Faro Barcelona we have an internal sustainability committee that promotes different sustainability actions and monitors them.

## Product

### Sustainability from conceptualisation

In our eco-design decalogue we set out the main guidelines we follow to make our designs more sustainable. We work with external consultants to reduce the environmental impact of our production processes, guaranteeing the quality and safety of our products. We are training our design team in circular design techniques for the more sustainable development of all our products.

### A longer useful life

We work to design timeless, repairable and long-lasting products in order to reduce their environmental impact. We research new methods to ensure that our designs last longer, are easy to repair and can be recycled.

### Standardisation and modularity

We work on the standardisation of components for a more efficient use of resources and more sustainable production. We develop modular collections that allow us greater versatility and more efficient logistics and transport.

### More sustainable processes and materials

One of the major challenges towards a more sustainable production is the choice of materials as it represents more than 70% of the product's carbon footprint. The use of recycled materials or materials with a lower environmental impact, the implementation of new techniques and the reduction of the number of materials used, help us achieve more sustainable manufacturing.

### Control of the supply chain

We share our sustainability vision and commitments with all our suppliers. We, therefore have a supplier code of conduct to ensure a more sustainable supply chain.

## CARBON FOOTPRINT CERTIFICATION

We have achieved certification of our carbon footprint calculation in accordance with the ISO 14064-1 international standard, a major milestone on our path to sustainability.

Thanks to this certification, we know the real volume of greenhouse gas emissions generated by our activity and it allows us to identify areas for improvement and implement compensation strategies through different programs.

We celebrate that we have successfully passed the sustainability audit carried out by EcoVadis, obtaining the prestigious Medal in recognition of our sustainability efforts and achievements.

Both certifications reaffirms our ongoing commitment to sustainability and corporate responsibility in all its facets and operations.

DESIGNERS  
ARTISTS  
CREATORS

They make our world a better place thanks to their ingenuity, talent and creativity.

Espacio Princesa  
Princesa 52 Barcelona

The creativity, ingenuity and design of Faro Barcelona can be found in the heart of the city. Welcome to Espacio Princesa!

Request visit

Docontract MAD  
Velázquez 35-4ºD Madrid

This innovative space has emerged with the purpose of simplifying the work of architects, interior designers and developers looking for solutions for their new construction or renovation projects.

Showroom París  
7 Rue d'Uzès Paris

A space in which to carry out commercial activities such as visits, product demonstrations and meetings, and to develop a calendar of scheduled events to experience first-hand the design concept in lighting and ceiling fans.

## SHOWROOMS

We planned it to be the meeting point for designers, interior designers, architects and creatives to share their concerns and create a whole experience.

At Faro Barcelona, we control the quality of our products and services from conception and design to functionality and reliability tests.

Our quality management system is based on ISO9001.

Compliance with electrical safety regulations under EN60598 and energy efficiency ERP.

The ceiling fan has become an essential element in the interior design of a space, providing style, functionality, efficiency and sustainability.

## WHY A FAN?

### Healthy & environmental friendly

It improves the air quality and contributes to our well-being and health. It does not emit toxic gases dangerous to the environment.

### Cost-effective

It ventilates and cool spaces with energy consumption 50% lower than other systems.

### Summer & Winter use

The rotation of the blades creates a refreshing breeze in summer and eliminates air stratification in winter.

Over 40 years of experience, we are your best choice.

## BEST CHOICE

Engine guaranteed for  
15 years.

High performance.

Wide range.  
Over 80 designs.

DC motor.  
Better performance.

Size is really important when selecting your ceiling fan. If a fan is too large, it can overwhelm the space. On the flip side, if the fan is too small, the airflow may be inadequate for that area.

## SIZE IT TO YOUR SPACE

# SMART FAN

Connection guide

Add a device.  
In this case a ceiling fan.

Enter your WIFI password.  
Make sure you are connected to a 2.4 GHz network.

Pair your fan.  
Choose the option of new fan to make the connection.

Configure the fan.  
Select the mode you want to use your fan in.

Regulate the light on your fan. You can modify the light emitted by your fan through the app.

Regulates fan speed. You can modify the speed of your fan through the app.

**TECHNOLOGY**

**SYSTEM**

We personalise and adapt fan functions to your project needs.

## CUSTOM FANS

How you want to  
control your fan

Our fans around  
the world

We adapt fan speeds  
to your needs

We modify the  
memory of your fan

Tell us your needs and we will make it happen

# FAN INTEGRATION

in automation projects.

Fan Integration in automation systems for Faro WP fans by 0-10/1 10V speed and light control.

Manage up to 128 fans per gateway

\*Control panel not included

\*Automation control not included

All WP fan are compatible.

34162  
Fan gateway 0 10/1 10V

34160 - Universal dimmable receiver for programming adaptations

Compatible with

and other control systems with 0 10/1 10V

# ONE CONTROL FOR ALL

Compatible with wall controller 33974

## \*Special configurations

### 1 Light function memory on/off, press and hold speed 1 key:

- 1 status (CURRENT): always once the power is input on, the light will turn on (and on maximum power if dimmable) settled from factory.
- 2 status: always once the power is input on, remember last use of on/off light and dim.

### 3 Sound confirmation on/off (beep), press and hold speed 3 key:

- 1 status (CURRENT): Only sound for pairing and set special configurations (1) (3)(4)(6), settled from factory.
- 2 status: Sound beep every key pressed.

### 4 Lock/Unlock Remote keys, press and hold speed 4 key:

- 1 status (CURRENT): all keys unlocked settled from factory.
- 2 status: Lock remote keys except on/off fan and on/off light keys.

### 6 Fan function memory on/off ( on/off fan, speeds, reverse, breeze mode) press and hold speed 6 key:

- 1 Status(CURRENT): always once the power is input on, FAN will be off, settled from factory.
- 2 status: always once the power is input on, remember last use on/off fan, speeds, reverse, breeze mode.

TRUE BEAUTY  
RESIDES  
IN SIMPLICITY.  
IN EVERY SMALL  
MOMENT WE  
DISCOVER  
THE EXTRAORDINARY.
